Fundamentals

Class 01 - Types of Variables and Data Organization

1. What are the primary features of Broman and Wu (2018) that enable reproducible research?
2. How will your workflow need to change to better emulate the approach of Broman and Wu and Malin Pinsky?
3. Broman and Wu and Pinsky stress consistency, what are some of the best examples of this.
4. What data will you collect in your dissertation and thesis - describe in detail the folder and data structure you will develop.
5. Describe the primary types of data that comprise the universe of potential variables.
